

Vuyani Sondlo

Area of residence: Yeoville, Johannesburg

Brief history and ownership period: I purchased the car about seven months ago from a lady in Emmarentia, she had been the owner of the car for five years or so. She could not tell me how many owners this car had before her. It had about 90,000 miles on the odometer when I bought it and is still in the early to mid 90's thousands miles.

I love the car and have since learned a lot about it, thanks to my joining the Triumph Club (Johannesburg). It's still work in progress to get it to a "perfect" state but it is also driving well and in fact it is my everyday car.

Restoration and Modification: I have not done any restoration. I have recently had my brake disks changed with the Chicane as the replacement for better braking system as my previous system was very bad almost fatal.
